FITNESS SERVICES

Welcome and thank you for your interest in Fitness Services at University Recreation. You are taking the first steps towards improved health and fitness. Our mission is to empower our clients to achieve active, healthy lifestyles through education, motivation, and training. To take the next step in your journey please read and complete this packet in its entirety. These forms are an important means for us to help you reach your goals safely and effectively.

Policies and Procedures:

Payment: Payment for our fitness services can be made at the Student Recreation Center or the Aquatic Center. Payment must be received in full prior to any service being scheduled. Full payment for partner training must be made by both individuals at the same time.

Expiration: All fitness service offerings expire 365 days from the date of purchase. Fitness services purchased are void after this time period.

Refund: Fitness service offerings are non-refundable unless a verifiable medical conflict exists (physician letter required).

Cancellation: Appointments must be canceled 24 hours in advance by notifying your personal trainer via phone and/or email. Appointments not cancelled will be charged as a training session/service. The trainer will make up any sessions he/she has to cancel.

Arriving Late: Please contact your trainer if you will be arriving late for your appointment. Trainers will wait 15 minutes for late arrivals, at that point the session/service will be charged and the personal trainer has the right to leave the premises. Session time missed for late arrivals will not be made up.

Partner and Group Training Cancellation: There are no individual make up sessions for partner or group training. Missing a partner or group session will result in that individual forfeiting the session.

Registration: The fitness services packet must be completed and submitted with payment to the appropriate University Recreation facility office prior to any service being scheduled. Upon receipt of these materials, a personal trainer will be in contact via email and/or phone within 3 business days to schedule an appointment.

Medical: After review of your medical history our Coordinator of Fitness Services may request you to submit information from your physician prior to scheduling an appointment. This is a very routine process for personal training and is an attempt to make certain that we follow all medical guidelines from your doctor.

Feel free to call us at any time with any new ideas, suggestions, or comments. Our goal is to help you improve your fitness and overall quality of life. Thanks for choosing us to help you meet your fitness needs.

Physical Activity Readiness Questionnaire - PAR-Q
(revised 2002)

PAR-Q & YOU

(A Questionnaire for People Aged 15 to 69)

Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. Being more active is very safe for most people. However, some people should check with their doctor before they start becoming much more physically active.

If you are planning to become much more physically active than you are now, start by answering the seven questions in the box below. If you are between the ages of 15 and 69, the PAR-Q will tell you if you should check with your doctor before you start. If you are over 69 years of age, and you are not used to being very active, check with your doctor.

Common sense is your best guide when you answer these questions. Please read the questions carefully and answer each one honestly: check YES or NO.

If you answered YES to one or more questions

Talk with your doctor by phone or in person BEFORE you start becoming much more physically active or BEFORE you have a fitness appraisal. Tell your doctor about the PAR-Q and which questions you answered YES.

• You may be able to do any activity you want — as long as you start slowly and build up gradually. Or, you may need to restrict your activities to those which are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice.

• Find out which community programs are safe and helpful for you.

If you answered NO honestly to all PAR-Q questions, you can be reasonably sure that you can:
• start becoming much more physically active – begin slowly and build up gradually. This is the safest and easiest way to go.
• take part in a fitness appraisal – this is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively. It is also highly recommended that you have your blood pressure evaluated. If your reading is over 144/84, talk with your doctor before you start becoming much more physically active.

Informed Use of the PAR-Q: The Canadian Society for Exercise Physiology, Health Canada, and their agents assume no liability for persons who undertake physical activity, and if in doubt after completing this questionnaire, consult your doctor prior to physical activity.

No changes permitted. You are encouraged to photocopy the PAR-Q but only if you use the entire form.

NOTE: If the PAR-Q is being given to a person before he or she participates in a physical activity program or a fitness appraisal, this section may be used for legal or administrative purposes.

"I have read, understood and completed this questionnaire. Any questions I had were answered to my full satisfaction."

Informed Consent

I desire to participate voluntarily in a progressive exercise program and/or various fitness tests in an attempt to assess and improve my physical fitness.

I understand that these physical activities and/or various fitness tests are designed to put a gradually increasing workload on my circulatory system and/or musculoskeletal system in an attempt to improve their function. The reaction of the system(s) to such activities cannot be predicted with complete accuracy. The possibility of certain unusual changes during or following the exercise session does exist. These changes could include abnormalities of blood pressure or heart rate, ineffective heart function, fainting, muscle strains, and possibly, in rare instances, a heart attack or cardiac arrest.

The benefits obtained from the various fitness tests might include an increased knowledge of chronic disease risk as well as baseline measures for the trainer to use in assessing improvements in your fitness level.

The benefits obtained from the exercise program might include a more efficient cardiovascular system, a decrease in the risk of heart disease and other chronic diseases, an improved muscular and skeletal system, and a higher quality of life. I realize that is necessary for me to report promptly any signs or symptoms indicating abnormalities or distress. I know that if there are any questions about the procedures or methods used during an exercise session or test, I should ask my trainer. If I have any doubt, concerns or questions I should ask for further explanation.

I have read this form and I voluntarily consent to participate in this exercise program and/or various fitness tests and realize that I am free to withdraw at any time.
